

Capacitors – Start & Run

GENERAL INFORMATION

Capacitors, both start and run, are held in stock by OBA and we list the features that are available.
Note These features are not necessarily available on every type and size. Please contact your nearest OBA office

APPLICATIONS

The main application for the capacitors held by OBA is for use in electric motors.

CONSTRUCTION

Capacitors are generally manufactured in a plastic cylinder however other types may be available on indent from our supplier.

TYPICAL SIZES

Starting Capacitors - Electrolytic	Size range	21µf to 995µf
	Voltages	125V to 300V
	Mounting	Can or Stud
	Terminations	Quick connect or Flying Lead
Starting Capacitor – Electronic	Size range	820µf to 1800µf
	Voltages	400V
	Terminations	Quick connect or Flying Lead
Run Capacitors	Size range	1µf to 100µf
	Voltages	400V to 450V
	Mounting	Can or Stud
	Terminations	Quick connect or Flying Lead

Capacitors, with special connectors, extended flying leads, or special mounting are available on request. Please contact your closest OBA office with your request
